

The Exhibition

Education for the New Millennium' is an exhibition conceived, designed, prepared and put up by The Gnostic Centre, based on its own work in the field of Integral Education, on educational philosophy conceived by Sri Aurobindo and The Mother.

The Exhibition showcases the 5 Elements involved in the process of Education - Earth (the student), Water (the teacher who helps shape the earth-student), Fire (of knowledge that strengthens the earth-student), Air (the methodology, communication), Ether (the learning environment).

It presents insights into Fivefold Education - the step-by-step training of all the aspects of an individual - the training of the Physical being, the Vital being/emotional self (character, senses), the Mental being (powers and faculties of the mind - concentration, observation, reasoning, memory, judgment, imagination, intuition) and the evocation of the higher faculties of the Psychic (soul) and the Spiritual.

On request from various schools that have appreciated the Exhibition, the Gnostic Centre is travelling with it and putting it up for teachers, principals and educationists.

The Exhibition is a precursor to the forthcoming CONFERENCE ON 'A NEW EDUCATION FOR A NEW INDIA: INTEGRAL EDUCATION' that the Centre is organising from November 2nd to 5th in Delhi, to introduce concepts and practical ways to implement Integral Education within the mainstream school systems - i.e. how to build up the powers of the mind, character and body, while dealing with information related to the curriculum.
